DIMOND'S LATEST CIRCULAR.

Our last circular was dated Feb. 10th per steamer Alameda.
SUGAR: New York advices report a moderate amount of business with a steady tone and more hopeful feeling, owing to the stronger market in Europe for Beet, which has advanced in London to 12 s. 3 d. There are indications that consumers are in need of fresh supplies, but are unwilling to buy freely for fear of advancing the market too rapidly. As yet it is too early to estimate upon the probabilities of the next Beet crop, but there are indications that the increased seeding in France under the new bounty laws will nearly compensate for the reduced acreage sown in the balance of Europe.
PRICES: No change since our last. New York Cuba's 95 percent test at 5 1/2 c. Manila basis 499 for 91 percent.
Our local Refineries have advanced yellows 1 c. per lb. making yellow C in barrels 5 c. net cash.
RICE: The market is quiet but firm at 4 1/2 & 5 c. Stocks on hand are large in proportion to the demand. Eastern Market strong.

Mr. William Emerson, with his fine minstrel troupe, arrived by the Mariposa this morning. He will stay here two weeks, leaving for the Colonies about the 21st, where he will remain about six months. Honolulu people will probably enjoy six performances by this well-known troupe of minstrels, the first of which will take place on Thursday evening. Mr. Emerson was here nine years ago, when he

ARRAIGNMENT OF SPECKELS.

Adolph B. Spreckels, with his counsel Ralph C. Harrison, was present in Department 11 of the Superior Court at 1 o'clock yesterday morning. It being the time set for arraigning Spreckels for the crime of attempting the murder of M. H. de Young last November. The people were represented by District-Attorney Wilson, while Reuben H. Lloyd appeared on behalf of Mr. De Young. Mr. Spreckels was called to the clerk's desk, where the criminal information formally charging him with the crime was read to him, and to which he answered "Not guilty." Judge Tooley then requested the attorneys to name the day they wished the case set for. Mr. Harrison said that he and the District-Attorney had agreed upon Friday, the 20th of March, but to this Mr. Lloyd objected on the ground that the case could not be finished in two days and it would necessitate a postponement over Sunday, to which he could not consent, evidently not wishing that the jury should be exposed to extraneous influences right in the midst of the trial. After some discussion Judge Tooley finally set the case for Monday, March 23rd.—S. F. Chronicle, March 1.

KAMAKA.

Kamaka is the name of a native who lives at the head of Kaula valley. He was very fond of drink, and also awa. Sometimes he would start from the town chewing awa-root, and would fall from his horse from the effects of it before he got home. Last Saturday he was drinking all day, and went home about 10 o'clock. He slept in a bed with a little boy, who missed him about 7 o'clock in the morning. About 10 o'clock another little boy ran and told his mother that Kamaka was lying asleep in the stream. Some natives went to the spot and found him lying in the stream head down, with outstretched arms, and quite dead. He had a slight bruise over the right eyebrow. Deputy Marshal Dayton soon afterwards went to the spot, and after making the fullest investigations, found it was not necessary to hold an inquest, there being no suspicion of foul play. He evidently fell into the stream while attempting to cross it, and under the strong influence of liquor.

TESTIMONY TO

IRON FILTER PRESSES

IMPORTED BY

H. HACKFELD & CO.

IT IS the second season this Press is in use in connection with the Lahaina Mill, and is proving a great success. I estimate the saving at about 5 percent of the crop. The many advantages these Presses have over the wooden ones in use on these Islands are as follows: They are much stronger, being able to stand a pressure of 100 pounds of steam; the skimmings are, therefore, forced through much quicker and consequently more work is being done with them. As each frame has a separate outlet, it is not necessary to stop working the Press altogether should one Press cloth be leaking; it is sufficient to stop the outflow of the leaking frame. The Press-cloth can be changed much quicker, as no sewing is required. The Press will last forever, it never can get out of order.
